Agreed interface improvements

• Hide disabled features everywhere, including cards, quick actions and navigation.

• Remove the mobile header question-mark tour button.

• Allow sizes/Half-Full and separate prices while creating a new dish.

• Show the tenant logo and brand name in the header; use brand initials if no logo is uploaded. Put owner details in the profile menu.

• Owner setup checklist has already been removed; the team handles onboarding remotely.

Commercial details still to specify: feature-add-on discount rules and setup payment timing. This document records the agreed product/pricing direction, not a completed deployment.
